## Saturday, 30 Oct. 2010 LECTURE by Tony Reznicek

*Why plants change their names: Rock Garden Plants, Woodland Plants, & Modern Biology*

Matthaei Botanical Gardens  
1800 N Dixboro Rd, Ann Arbor, MI  
(734) 647-7600

**To the Matthaei Botanical Gardens: From US23**  
Take Exit 41 East onto Plymouth. Follow Plymouth to Dixboro at the lights turning Right (South) onto Dixboro. At the Sign on your left turn in the Matthaei Botanical Gardens.

## **Saturday, September 18, 2010 Fall Meeting and Plant Sale: 900 AM – ca. 3:30 PM**

The Plant Sale will be at 1:30 PM at Mike Harvey's. See map other side for directions to Mike's, and the open gardens.

### **Open Gardens:**

**Amy and Dave Miller:** Speaking of park-like settings, the Miller's property backs up to Stony Creek Metropark. The wildlife and native flora just outside their door, including black cherries, choke cherries and dogwoods have inspired Amy's landscape choices in the 2 years since moving to this new garden. A bevy of butterflies and birds greet visitors amid carefully selected plantings for their benefit, added to a collector's choice of hosta, Japanese maples, roses, conifers, and more. **Please note: Amy & Dave have a commitment at 2:00 PM be sure to leave their garden in time.**

**John and Yvonne Iuppenlatz:** In a park-like setting amid mature pines, beech and a rare surviving American elm, John and Yvonne have indulged their passion for Japanese maples, hydrangeas, hostas, dwarf conifers and especially Rhododendron, including many deciduous azaleas.

**Dianne and George Hilborn:** As a long-time perennial buyer for Telly's Greenhouse and member of NARGS and the Hardy Plant Society, Dianne has collected many gems over the years from many different out of the way corners of the US. The squirrels do deserve some credit (or blame) for her heavily oak wooded lot. Franklinia, wintersweets, and witch hazels are just a small part of this very eclectic and diverse collection.

**Mike & Donna Harvey:** You have to visit Mike's & Donna's garden anyway. Let it be a SURPRISE!

## **SATURDAY, October 30, 2010: FALL MEETING 1:30 PM Matthaei Botanical Gardens**

After a brief business meeting, Tony Reznicek will show us many interesting facets of how our understanding of the relationships of our favorite rock garden and woodland plants have changed with modern biology – some of this information may even help us grow the plants better.

**PLANT SALE PREPARATIONS for September 18<sup>th</sup>:** If you are a newcomer to our group, you will be surprised at the diversity, number of rarities, and size of our two yearly plant sales. They are one of the best things about being a chapter member, and offer the opportunity to get wonderful and unusual plants at very reasonable prices. Also, the sale is very important to the chapter, as it raises the funds for our excellent speaker program. But because of the size of the sale, we do need to have people try to follow certain rules to make the sale run smoothly and quickly.

### **At home:**

- 1). Please pot or repot plants at least ten days before the sale. Otherwise, the plants may look ragged.
- 2). Please select appropriate plants for the sale. Interesting and unusual alpiners, woodland plants, and small woody plants are ideal. No large, common woody plants, annuals, common perennials, and tropicals, please.
- 3). Before you bring the plants, label each pot, with the name of the plant [scientific name, if known, and cultivar or variety, if known]. On the back of the label put your name and the year. This allows people both at the sale or later to ask you about the plant. It also helps us when setting up the sale to talk to you if, for example, you have missed putting a price on the plant.
- 4). We ask people to price their own plants. You can price your plants at home, if you like, but please use a separate price label. The price labels are pulled out of the pots by the cashier to expedite adding up the total.

### **At the sale:**

- 1) If you have not priced your plants at home, please use the chapter price labels provided to price each pot. Prices range from \$2 to \$6.50, but mostly are within the \$2 to \$4 range. Set your plants as close together as possible on the selling tables. You should try to get your plants to the sale a half-hour or so before the sale starts to get them set up and priced, if necessary.
- 2) Ask Jacques Thompson to look at your plants. For every 10 plants you bring, you are given one Red Label. Each Red Label entitles you to one "First Pick." This means that those who did not bring plants must stand back and wait for those with Red Labels to make their First Picks. The time for First Pickers to make their choices is limited to 3-5 minutes depending upon the number of First Pick labels given out. Keep in mind that you still have to pay for the plants.
- 3) Tell Jacques if you think you might have brought a plant or plants that you think might be of "Auction Quality." These are normally either exceptionally rare and desirable plants not available commercially, plants available only at a very high cost, or large, well-grown specimens of highly desirable plants. We try our best to keep the auctions highly selective, and if you have plants selected for auction, you will get an additional Red Label for each plant.
